

NATIONAL INSTITUTE OF TECHNOLOGY KARNATAKA
SURATHKAL, MANGALORE - 575 025

Course Code – CS111

Course Name – Computer Programming Lab

Lab - 08

Date – August 10, 2021

Submitted To

Marwa Mohiddin Ma'am

Department of Computer Science and Engineering
National Institute of Technology Karnataka, Surathkal

Submitted By

Md Rakib Hasan

Roll – 201CS132

Department of Computer Science and Engineering

Files and file operations

Question – 1

Program to read data from the keyboard; write it in a file called DATA.txt. Again read the same data from the file and display it on the screen.

Answer

```
#include <stdio.h>
#include <stdlib.h>
#include <string.h>
int main()
{
    FILE *fp;
    char name[20], line[50];
    int i, n, roll;
    fp = fopen("DATA.txt", "w");
    if (fp == NULL)
    {
        printf("An error occurred");
        exit(1);
    }
    else
    {
        printf("Total student: ");
        scanf("%d", &n);
        for (i = 0; i < n; i++)
        {
            printf("Enter roll: ");
            scanf("%d", &roll);
            printf("Enter name: ");
            gets(name);
            fgets(name, 20, stdin);
            name[strcspn(name, "\n")] = 0;
            fprintf(fp, "%d %s\n", roll, name);
            printf("\n");
        }
    }
}
```

```

    }
    fclose(fp);
}
fp = fopen("DATA.txt", "r");
if (fp == NULL)
{
    printf("An error Occured");
}
else
{
    i = 0;
    printf("Showing info from file: \n");
    while (i < n)
    {
        fgets(line, 50, fp);
        printf("%s", line);
        i++;
    }
    fclose(fp);
}
return 0;
}

```

Output

```

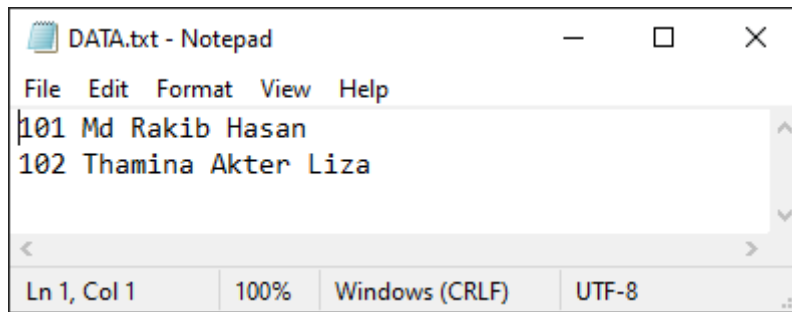

E:\2nd SEM\A. Lab\CS111\Lab 8\1-read-store-sho...
Total student: 2
Enter roll: 101
Enter name: Md Rakib Hasan

Enter roll: 102
Enter name: Thamina Akter Liza

```

Question – 2

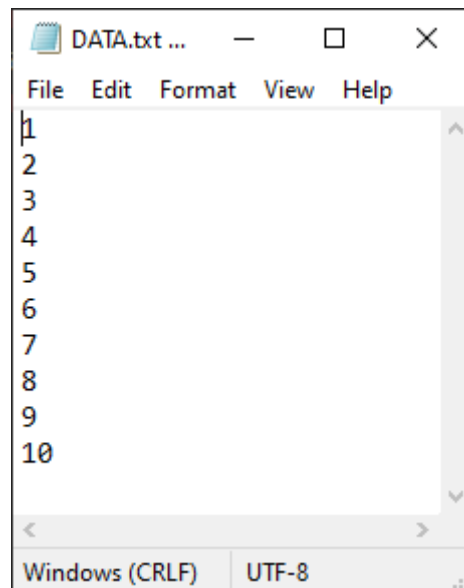

A file named DATA.txt contains a series of integer numbers. Write a program to read these numbers and then write all odd numbers to a file to be called ODD and all even numbers to a file to be called EVEN.

Answer

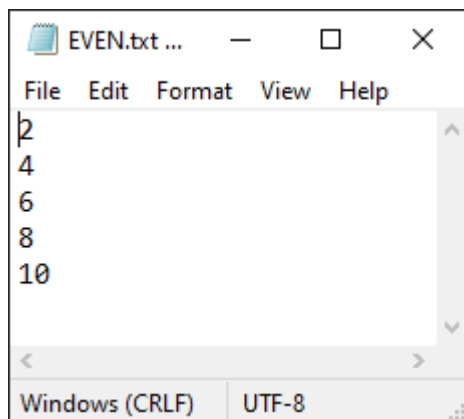

```
#include <stdio.h>
int main()
{
    FILE *fp, *even, *odd;
    int num;
    fp = fopen("DATA.txt", "r");
    even = fopen("EVEN.txt", "w");
    odd = fopen("ODD.txt", "w");
    if (fp == NULL || even == NULL || odd == NULL)
    {
        printf("An error occurred");
    }
    else
    {
        while (!feof(fp))
        {
            fscanf(fp, "%d", &num);
            if (num % 2 == 0)
            {
                fprintf(even, "%d\n", num);
            }
            else
```

```
        {  
            fprintf(odd, "%d\n", num);  
        }  
    }  
}  
fclose(fp);  
fclose(even);  
fclose(odd);  
return 0;  
}
```

Input

Output

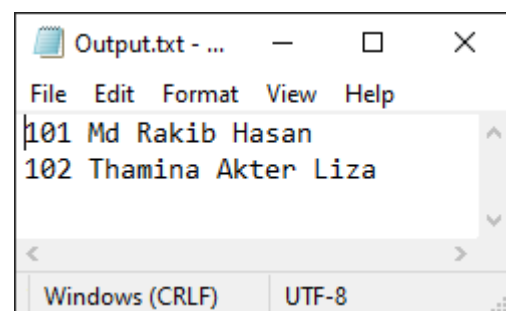

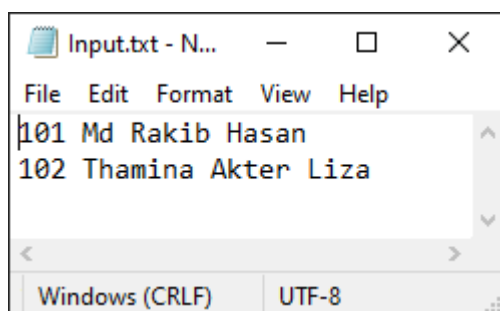

Question – 3
Copy the content of one file into another

Answer

```
#include <stdio.h>
int main()
{
    FILE *fp_in, *fp_out;
    char line[50];
    fp_in = fopen("Input.txt", "r");
    fp_out = fopen("Output.txt", "w");
    if (fp_in == NULL || fp_out == NULL)
    {
        printf("An error occurred");
    }
    else
    {
        while (!feof(fp_in))
        {
            fgets(line, 50, fp_in);
            fprintf(fp_out, "%s", line);
        }
    }
    fclose(fp_in);
    fclose(fp_out);
    return 0;
}
```

Input and Output

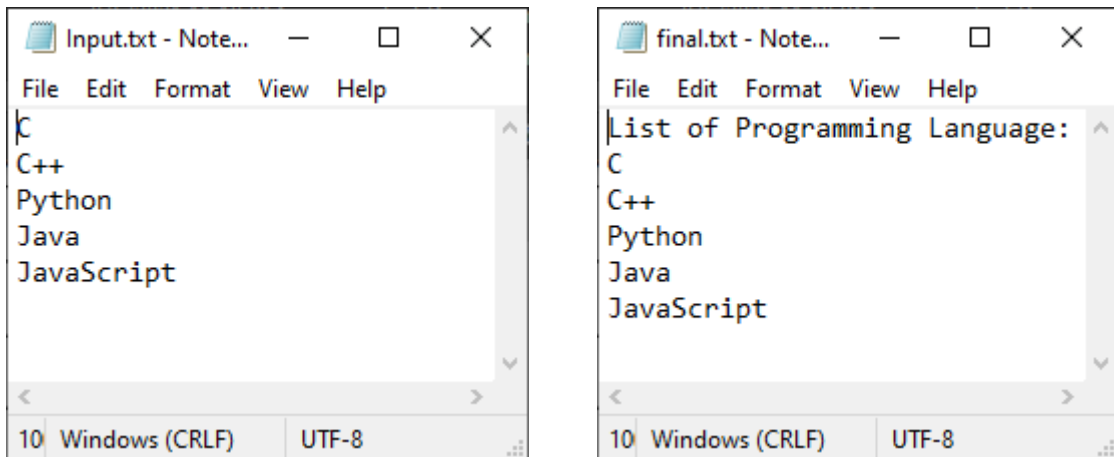

Question – 4

Program to append the content of a file at the end of another file without using append mode

Answer

```
#include <stdio.h>
#include <stdlib.h>
int main()
{
    FILE *fp_in, *fp_out;
    char line[100];
    fp_in = fopen("Input.txt", "r");
    fp_out = fopen("final.txt", "r+");
    if (fp_in == NULL || fp_out == NULL)
    {
        printf("An error occurred");
        exit(1);
    }
    else
    {
        fseek(fp_out, 0, SEEK_END);
        while (!feof(fp_in))
        {
            fgets(line, 100, fp_in);
            fprintf(fp_out, "%s", line);
        }
    }
    fclose(fp_in);
    fclose(fp_out);
    return 0;
}
```

Input and Output

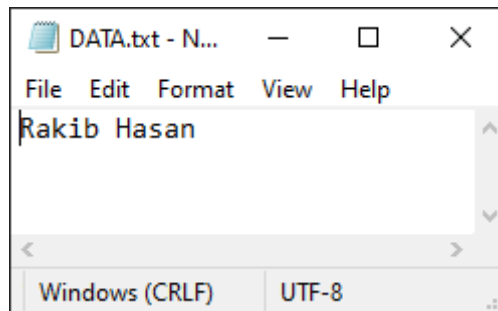

Question – 5

Program to find the size of file using file handling function

Answer

```
#include <stdio.h>
#include <stdlib.h>
int main()
{
    FILE *fp;
    fp = fopen("DATA.txt", "r");
    if (fp == NULL)
    {
        printf("An error occurred");
        exit(1);
    }
    else
    {
        fseek(fp, 0, SEEK_END); //moving pointer to end
        printf("Size = %ld bytes", ftell(fp));
    }
    fclose(fp);
    return 0;
}
```

Input and Output

Question – 6

Program to find the number of lines in a text file

Answer

```
#include <stdio.h>
#include <stdlib.h>
int main()
{
    FILE *fp;
    char ch;
    int count = 1;
    fp = fopen("DATA.txt", "r");
    if (fp == NULL)
    {
        printf("An error occurred");
        exit(1);
    }
    else
    {
        while (!feof(fp))
```

```

    {
        ch = fgetc(fp);
        if (ch == '\n')
        {
            count++;
        }
    }
}
fclose(fp);
printf("Total Line = %d", count);
return 0;
}

```

Input and Output
